XC LINE LAMINATES – WITH XTREME COATING

Advanced Fusible Interlinings for Thobes

The collar is one of the most important quality features of a high-quality thobe. To maintain shape, appearance, and stability through repeated washing, these garments require an interlining system specifically developed for their fabrics and construction methods.

Our new XC Line Laminates featuring **Xtreme Coating** provide reliable fusion performance, durable high bonding, and the structural support required for thobe manufacturing.

XC Line Product Range

Construction	Material Options	Weight Range	Handfeel
Single-Layer Laminates	100% CO or 100% PES	280-410 g/m²	Soft to Hard
Double-Layer Laminates	100% CO or 100% PES	710 g/m²	Extra Hard

Why Xtreme Coating?

- **Reliable Bonding Performance**
  Delivers strong and consistent bonding on the fabrics commonly used for premium thobes.
- **Improved Shape Retention**
  Supports clean collar construction and stable cuffs throughout the garment life cycle.
- **Excellent Wash Resistance**
  Maintains bond integrity and garment appearance after repeated laundering.
- **Process Reliability**
  Consistent fusion performance helps reduce manufacturing risks and improve production efficiency.

✓ Strong bonding ✓ Excellent wash durability ✓ Reliable processing
✓ Reduced risk of bubbling and delamination ✓ Stable collar and cuff construction
✓ Available in cotton and polyester constructions

TEST IT. FEEL IT. TRUST IT.
